
THE JOURNAL OF LOGIC AND ALGEBRAIC PROGRAMMING

Volume 81, issue 4, May 2012

CONTENTS

Special Issue

Guest Editor's foreword M.R. Hansen	355
Three-valued abstraction for probabilistic systems J.-P. Katoen, D. Klink, M. Leucker and V. Wolf	356
Automated debugging based on a constraint model of the program and a test case F. Wotawa, M. Nica and I. Moraru	390
Modal transition systems with weight intervals L. Juhl, K.G. Larsen and J. Srba	408
A formal approach to the specification and transformation of constraints in MDE A. Rutle, A. Rossini, Y. Lamo and U. Wolter	422
A dynamic deontic logic for complex contracts C. Prisacariu and G. Schneider	458
A relational realizability model for higher-order stateful ADTs L. Birkedal, K. Støvring and J. Thamsborg	491
Static Analysis of IMC N. Skrypnjuk, F. Nielson and H. Pilegaard	522
Termination detection for active objects F.S. de Boer, I. Grabe and M. Steffen	541
